

FasciaCap Stair Riser Installation Instructions

1. Make sure the Stair Stringer and Riser are square cut to the edge of the stair stringer framing member.
2. Measure the height from the underside of the deck board above the piece to the underside of the stair tread at the bottom.
3. Cut the FasciaCap with a sharp, carbide miter saw blade or sharp tin snips.
4. Trim the FasciaCap as needed to fit around the stair tread.
5. Install the FasciaCap with a ¼" head, 2.5" composite deck screws and seat the screws below the surface.
6. Align the grain and install the FasciaCap plugs flush with the FasciaCap.
