

Plug Installation Instructions: “How to plug”

TopCap Plugs:

- 1.) Make sure the fastener is fully seated in the TopCap, so there is room for the plug to be installed.
- 2.) Align the grain of the plug with the grain direction of the TopCap.
- 3.) Press the plug in by hand and then lightly tap the plug with a smooth faced hammer.
- 4.) Make sure the plug is tapped in flush with the TopCap.

FasciaCap Plugs:

- 1.) The Fascia Cap plug is designed to be pressed in by hand to avoid needing a hammer that might damage the shape of the plug.
- 2.) Make sure the fastener is fully seated in the FasciaCap, so there is room for the plug to be installed.
- 3.) Align the grain of the plug with the grain direction of the FasciaCap.
- 4.) Press the plug in by hand and make sure the plug is aligned and flush with the FasciaCap.
